pramod@knoesis.org

Education

- **Wright State University** Dayton, USA
Doctor of Philosophy (PhD) in Computer Science and Engineering May 2009 - April 2016
– Dissertation title: *Knowledge-empowered Probabilistic Graphical Models for Physical-Cyber-Social Systems*
- **Wright State University** Dayton, USA
Masters of Science (MS) in Computer Science Jan 2009 - April 2009
- **Visvesvaraya Technological University** Bangalore, India
Bachelor of Engineering (BE) in Electrical and Electronics 2002 - 2006

Awards & Recognition

- 2015 Selected to participate in the NSF-funded Data Science Workshop at University of Washington, Seattle, Aug 5–7.
- 2015 Our ACM Transactions on Intelligent Systems (TIST) Journal paper was a featured article on the ACM TIST website and the 5th most downloaded article.
- 2014 Offered the Eric & Wendy Schmidt Data Science for Social Good Fellowship.
- 2013 A short article on my research appeared in Wright State University newsroom.
- 2013 Invited to attend Dagstuhl Seminar on Physical-Cyber-Social Computing.
- 2013 Invited to present my work on *Data Analytics for Internet of Things (IoT)* at University of Debrecen, Hungary.
- 2012 NSF travel award for attending the International Semantic Web Conference (ISWC).
- 2012 Best research showcase award for my internship work at IBM Research, India.

Professional Activities

- Program Committee member: ESWC 2016, Web Science track at WWW 2016, Semantics and Big Data track at WWW 2016, Semantic Sensor Networks and Terra Cognita (SSN-TC) at ISWC 2015, Journal of Internet Services and Applications, ISWC 2015, The 6th Workshop on Semantics for Smarter Cities (S4SC 2015) at ISWC 2015, Web Science Track at WWW 2015, 5th Workshop on Semantics for Smarter Cities at ISWC 2014, Second International Workshop on Internet of Things,

in Conjunction with CollaborateCom 2014, Semantic Sensor Network Workshop at ISWC 2013, ISWC 2014, The ICSE 2014 Workshop on Inclusive Web Programming, Hypertext 2014, Web Science Track at WWW 2014, SSN Workshop at ISWC 2013, DeRiVE Workshop, ISWC 2013, IJCAI 2013

- Society Membership: SIAM (Society for Industrial and Applied Mathematics)

Research Experience

- **Graduate Research Assistant** Kno.e.sis
Lead Researcher, Sustainability and IoT *Jan 2012 - Present*
 - Keywords: Event extraction from text, sensor data analysis, time series analysis, anomaly detection, linear dynamical systems
 - Collaboration: CityPulse consortium, IBM Research
 - Extraction of traffic-related events in a city from social data (e.g., SMS messages, Twitter)
 - Modeling and understanding traffic dynamics using time series models
 - Understanding city traffic-related events utilizing both sensor and social data streams
- **Graduate Research Assistant** Kno.e.sis
Lead Researcher, kHealth for Asthma *Dec 2012 - Present*
 - Keywords: Asthma management, active sensing, passive sensing, sensors and mobile devices
 - Collaboration: Dayton Children's
 - Lead the development of sensor-enabled mobile application for collecting asthma-related observations from personal, public, and population level sources
 - Completed a pilot study involving six patients with promising results in combining active sensing (user involved in data collection) with passive sensing (user not involved in data collection)
 - Took lead in writing a NIH proposal which received very good ratings; awaiting funding
- **Graduate Research Assistant** Kno.e.sis
Team member, Semantic Sensor Web project *Sep 2009 - Dec 2011*
 - Keywords: Knowledge representation, sensor modeling, observation modeling, annotation, trustworthiness, Bayesian models
 - Worked on modeling sensors and their observations using the W3C Semantic Sensor Network ontology for various applications and sponsor requirements
 - Assessing trustworthiness of sensor nodes utilizing Bayesian approaches
 - Implemented a Bayesian reputation system for over 30,000 weather stations from MesoWest
- **Teaching Assistant** Computer Science Dept., Wright State University
C programming lab *Sep 2009 - March 2010*
 - Responsible for teaching basic C programming and conducting lab sessions
- **Graduate Research Assistant** Kno.e.sis
Team member, Twitris project *Feb 2009 - Aug 2009*
 - Keywords: Text processing, relevance ranking
 - Worked on algorithms to fetch relevant multimedia content from various sources based on the event descriptors.
- **Graduate Research Assistant** Kno.e.sis
Team member, T.crizi project *Feb 2009 - Aug 2009*

- Keywords: Semantic technologies, Resource Description Framework (RDF), Web Ontology Language (OWL), SPARQL Protocol and RDF Query Language (SPARQL)
- Responsible for ontology-driven RDF translation of relational data
- Explored tools like D2RQ engine, Jena, and other APIs for reading and writing RDF data

Professional Experience

- **Bosch Research and Technology Center**

Pittsburgh, PA

Research Intern

May 2014 - Aug 2014

- Widespread use of mobile devices and availability of sensors has resulted in unprecedented opportunities across many domains. One such opportunity is in leveraging Internet of Things (IoT) environment for assisting people in Do-It-Yourself (DIY) tasks.
- I worked on representation of tasks and recommendation of step-by-step instructions to accomplish DIY tasks in IoT environment.
- Specifically, I proposed a Markov Decision Process (MDP) based approach for task recommendation. I also worked on transforming domain knowledge of tasks (such as task complexity and resource requirements) into MDP parameters.
- My work was deployed as a task recommendation module into a larger IoT middleware designed by Bosch.

- **University of Surrey**

Guildford, United Kingdom

Visiting Doctoral Student

Sep 2013 - Nov 2013

- Cities are crippling under immense pressure from increasing people and limited natural resources, given that three-quarters of the world's population will be living in cities by 2050.
- A city with intelligent infrastructure would be a boon to its citizens and also facilitate conservation and efficient utilization of natural resources. Many citizens in a city talk about various problems they face and even recommend possible solutions.
- At Center for Communications Systems Research (CCSR), I worked closely with Dr. Payam Barnaghi on the problem of extracting city traffic-related events from Twitter.
- Specifically, I proposed algorithms to extract traffic events from short text messages from a city and compared it with ground-truth data from city authorities with promising results.

- **IBM Research**

Delhi, India.

Research Intern

Jun 2012 - Sep 2012

- Traffic is a major challenge in most of the cities around the world for both citizens and city policy makers.
- My research focused on leveraging dynamic SMS updates of traffic incidents from city authorities in the city of Delhi to assess its impact on traffic. Further, I worked on updating static schedule of public transport vehicles based on these dynamic updates.
- The result of my internship work was integrated into a journey planner called IRL-Transit used to provide event-aware route recommendation for commuters.
- My work was awarded the best research showcase in the poster presentation competition.

- **IBM Research**

Delhi, India.

Research Intern

Jun 2011 - Sep 2011

- I worked on a project that was part of the IBM Smart Planet initiative. Specifically, I worked on devising Bayesian reasoning techniques to evolve a Smart City ontology.

- The ontology had concepts and relationships describing various systems in a city, e.g. departments and services offered by them. Services offered by different departments may vary from one city to the other.
- Departments in a city may choose to add or remove new service offerings. Starting from a core ontology, incoming evidences (terms extracted from domain specific documents) were analyzed to evolve the core ontology.

- **Hewlett-Packard Global Soft Ltd**

Bangalore, India.

- *Software Engineer*

Jul 2006 - Dec 2008

- My role was to develop and enhance various software applications involving content management systems.
- I was responsible for many application migrations that were part of DCC (Data Center Consolidation) project.
- I was recognized for my contributions in the form of e-awards. Some technical skills gained are shell scripting, Java programming, and use of Documentum for content management applications.

- **Honeywell Technology Solutions Lab**

Bangalore, India.

- *Intern*

Feb 2006 - May 2006

- The goal of this internship was to develop an Internet-enabled device that monitored a set of sensors attached to it and reported the sensor observations to a database.
- People or an application can use these observations and take appropriate action based on sensor states.
- The complete implementation of the project was done in C. Some technical skills acquired are in utilizing a microcontroller and its interfacing with sensors resulting in my first IoT project.

Patents

Co-inventor of 2 US Patents

- US20150006644 A1: Assessing Impact of Events on Public Transportation Network
- US20140372364 A1: A System and Method for Utility-Based Evolution in a Constrained Ontology

Tutorials

Courses (relevant to my research)

Artificial Intelligence, Information Retrieval, Probability and Statistics for Engineers, Programming Languages, Computational Complexity, Algorithm Design, Knowledge Representation and Semantic Web, Communications in Science, Machine Learning (*Coursera*) , Statistical Learning (*Stanford Online*) , Probabilistic Graphical Models (*Coursera*)

Technical Skills

- **Machine Learning:** Bayesian Networks, Conditional Random Field (CRF), Linear Dynamical System (LDS), Markov Decision Process (MDP), Hidden Markov Model (HMM), Linear Regression, Logistic Regression, Decision Trees, Random Forest, Support Vector Machine, Neural Networks, Ensemble Methods
- **Databases:** MySQL, Virtuoso, Jena, Neo4j
- **Languages:**
 - Programming: Java, Python (incl. NumPy, SciPy, scikit-learn, matplotlib, Pandas), R, Matlab, Shell, PHP, Scheme, Java Script
 - Knowledge Representation: RDF, RDFS, OWL
